If you shoot your arrow and it disappears from sight and you find it later, you may eat it (the game) unless it smells bad

Abu Tha'labah (my Allah be pleased with him) reported: The Messenger of Allah (may Allah's peace and blessings be upon him) said: "If you shoot your arrow and it disappears from sight and you find it later, you may eat it (the game) unless it smells bad."

[Authentic hadith] [Narrated by Muslim]

This Hadīth stated that if a hunter fires an arrow or something similar, and it hits the game but it disappears from his sight, if he finds it later without any trace of something causing its death other than his arrow, he may eat it unless it has reached the point of decay, thus becoming impure and harmful to human health.
